Biography

Ian Beil
Portland General Electric

Dr. Ian Beil is an electrical power system engineer, researcher, and instructor. As a Grid Edge Engineer at Portland General Electric, his work focuses on incorporating energy storage and electric vehicle technologies into the power system.

He has held previous industry positions in transmission system planning, renewable energy integration, and electromagnetic transient analysis, and has worked in National Lab, consulting, and utility environments.

He has also served as an adjunct faculty member at PSU's Maseeh College of Engineering since 2020.
