

Biography

Daniel Black Volvo Energy

Daniel Black is the Product Manager for Charging Hardware Solutions at Volvo Energy, responsible for the North American EVSE product offering in support of Volvo and Mack Trucks. Volvo Energy is Volvo Group's newest business area, with a mission to accelerate electrification and sustainability for Volvo Group products. Daniel has more than 5 years of experience driving zero emissions product development for Volvo Group, supporting both vehicle as well as charging and infrastructure solutions development for heavy duty applications. Daniel has been an active member of the CharIN MCS taskforce since its inception in 2018 and is currently part of 3 other SAE standards related to charging and HD BEV.

Daniel Holds degrees in Electrical Engineering and Computer Engineering with a certificate in Renewables from North Carolina State University and is based in Greensboro, NC.
