

Biography

Marc Mueltin Switch

Marc Mültin has over 13 years of experience in the e-mobility space, holds a PhD in Computer Science and is the leading global expert and co-author of international EV communication standards (ISO 15118 & OCPP 2.0.1) that underpin the Switch platform.

Switch was founded by Marc in the UK in early 2020 to accelerate EV adoption worldwide with next-generation software. The Switch platform offers advanced capabilities for a seamless charging experience, total operational control and revenue-generating V2G functionality.

In addition, he is a member and trusted advisor of the ISO 15118 standardisation body and the Open Charging Alliance and has trained and educated over 80+ global companies on the EV-to-charger communication standard ISO 15118.
