

Biography

Claas Bracklo CharIN e. V.

Claas Bracklo is Chairman of the Charging Interface Initiative (CharIN e. V.), Senior Consultant Electromobility at the VDA and Senior Manager within the power train development at BMW.

Claas Bracklo joined BMW in March 2005 and held various positions in research and development with focus on E/Earchitectures, system design, hardware/software components and in car networking. Before his current position in the powertrain development he was in charge of body electronics development.

He started his career at Mercedes Benz and Daimler in the development of data bus systems. He led several teams and departments in the area of system test, E/Earchitecture and ECU-development.

Claas Bracklo holds a degree in Electrical Engineering from the University of Dortmund.
