

Biography

Dustin Schell California Energy Commission

Dustin is an Air Resources Engineer with the California Energy Commission's (CEC) Light-Duty Electric Vehicle Infrastructure and Analysis Branch and is the staff lead for EV charging reliability. Prior to his current role at the CEC, Dustin worked as an engineer for the California Air Resources Board where he was the technical lead on developing hardware for a remote detector of high-emitting mobile sources. He has also held several other roles in industrial settings before entering state service.

Dustin is a graduate of UC Berkeley's College of Chemistry with a B.S. in chemical engineering, a licensed engineer in the state of California, and a US Army Infantry veteran.
