

Biography

Amber Putignano ABB E-mobility

Amber Putignano was appointed Global Marketing Manager for ABB E-mobility's Fleet and Transit business in August 2022. For more than a decade, the global business has provided a complete range of charging and infrastructure solutions from slow AC charging, DC fast charging and Ultra-fast charging to electric bus and heavy vehicle charging. She oversees the strategical and promotional activities of ABB E-mobility's fleet charging and electrical infrastructure solutions and is passionate about the company's ability to influence sustainable change through innovation in E-mobility.

Prior to this role, Amber built ABB E-mobility's global marketing and communications team from the ground up to support the rapid expansion of the business. She has also held various roles from sales to leading business development activities within the solar segment for ABB. Prior to joining ABB in 2010, Amber was responsible for new product development in R&D at Schneider Electric for 8 years.

Amber has a degree in Electrical Engineering from Clemson University in South Carolina. She is currently based in the USA in Atlanta, GA.
