

Biography

Cliff Fietzek InCharge Energy, Inc.

Cliff Fietzek is the Chief Technology Officer for InCharge Energy, Inc. In this role, he is responsible for all technology aspects of InCharge, which includes all electric vehicle charging solutions, the future oriented fleet and commercial charging network platform In-Control as well as all the validation and interoperability activities in the Richmond, VA facility.

Previously, Cliff held the position as Sr. Director of Technology for Electrify America, LLC. In this role, he was responsible for all charging hardware, battery storage, the backend IoT platform as well as all other technology deployments and the validation efforts to insure interoperability with all electric vehicle manufacturers in the US market.

Prior to Electrify America, Cliff held the position as Manager of connected e-mobility at BMW of North America, where he was responsible for all engineering aspects around the BMW i Program, including vehicle development and validation, public infrastructure, smart charging and battery second life.
