

Biography

Oleg Logvinov

IoTecha Corporation

Mr. Logvinov is a co-founder, President, and CEO of IoTecha Corporation. IoTecha provides software and hardware products, and Cloud Platform as a Service to power major Internet of Things market segments, including Electric Vehicle Charging Infrastructure and Smart Factory. IoTecha is accelerating the Electric Vehicle revolution by providing critical hardware and software components for the Smart Charging infrastructure and enabling the integration of tens of millions of Electric Vehicles with the Power Grid.

Prior to joining IoTecha Mr. Logvinov was a Director of Special Assignments in STMicroelectronics' Industrial & Power Conversion Division where he was deeply engaged in market and technology development activities in the area of Industrial IoT including the applications of the IEEE 1901 powerline communication technology in harsh environments of industrial IoT and EV Charging. During the last 25+ years Mr. Logvinov has held various senior technical and executive management positions in the telecommunications and semiconductor industry. After graduating from the Igor Sikorsky National Technical University of Ukraine (KPI) with the equivalent of a Master's degree in electrical engineering, Mr. Logvinov began his carrier as a senior researcher at the R&D Laboratory of the Ukraine Department of Energy at the KPI.

the **next level**
of e-mobility

Mr. Logvinov actively participates in IEEE's standards development activities with the focus on the IoT and Communications Technologies. Mr. Logvinov is the chair of the IEEE P2413 "Standard for an Architectural Framework for the Internet of Things" Working Group and the IEEE P1901.1 "Standard for Medium Frequency (less than 15 MHz) Power Line Communications for Smart Grid Applications". Mr. Logvinov is also a past member of the IEEE Standards Association (IEEE-SA) Corporate Advisory Group, the IEEE-SA Standards Board, and the past chair of the IEEE Internet Initiative. Mr. Logvinov is a creator of a series of worldwide IEEE Startup Networking events. He helped found the HomePlug Powerline Alliance and is the past President and CTO of the Alliance. Mr. Logvinov has over thirty patents to his credit and has been an invited speaker on multiple occasions.
