

Biography

Paul Stith Black & Veatch

Paul Stith is a recognized leader in the transportation electrification space. At Black & Veatch he is the associate vice president of global transportation initiatives. With more than 30 years' experience in technology and business, and active in electrification for over a decade on policy, program development and execution for light, medium and heavy-duty vehicle charging infrastructure in urban, distributed and corridors.

Stith leads teams planning and building sustainable transportation and distributed clean energy infrastructure. He works on BV projects that span the globe, from North America, South America to Europe and Asia, as he supports investors, developers, OEMs, utilities, fleets and transportation service providers to electrify and automate ground, aviation and marine fleets. Paul sits on the board of Forth, a leading U.S. organization advancing clean transportation and North America Council for Freight Efficiency (NACFE).

Mr. Stith speaks frequently at U.S. and international events and was lead author of multiple studies.
