

ABOUT ZEROVA STORY

Zerova Technologies designs and manufactures a complete line of electric vehicle (EV) charging solutions, including AC Level 2 and DC Level 3 systems. These cutting-edge charging solutions are utilized by leading brands across more than 40 countries. Whether delivering white-label solutions or engaging in collaborative design partnerships, Zerova collaborates with partners to ensure success and alignment with their global channel strategies.

Operating as a subsidiary of the Pihong Group, Zerova leverages over 50 years of industry-proven expertise in manufacturing power products globally. This extensive experience empowers Zerova to offer an industry-leading product portfolio, catering to various EV charging use-case scenarios. With manufacturing facilities strategically located in Taiwan, China, Vietnam, Japan, EMEA, and the United States, Zerova is well-equipped to meet the diverse needs of its partners.
