

Biography

Maciej Wojéński

Ekoenergetyka-Polska S.A.

Co-founder of Ekoenergetyka-Polska S.A. - a global producer of fast charging infrastructure for electric vehicles, whose systems and solutions are present in 28 countries, including most European capitals. An expert in the field of sustainable development in transport and electromobility, an entrepreneur from the new technologies industry. For over 10 years, creating and promoting the latest solutions in fast charging systems on a global scale. While still a university student in the field of electrical engineering, he began to develop charging systems for electric vehicles, and immediately after graduation, started to build a technology company, which is now a leading supplier of charging systems for electric buses in Poland.

The co-creator of the company's development concept, under which Ekoenergetyka builds Research and Development Centers for new technologies in electric transport. Currently responsible for the company's expansion strategy to foreign markets and building brand awareness as well as promoting the company's fast charging solutions, which today allow the implementation of zero-emission vehicles in cities and long-distance transport.
