

Biography

Torsten Gruhn

Bender Electronics USA

Torsten Gruhn started out as a certified electrical motor rewinder in Germany. He graduated from trade school and worked on everything electrical that can turn, produce or transform power. He obtained a degree in electrical engineering from the University GH in Paderborn, Germany with an emphasis on power generation, transmission, and distribution.

The main focus at his current position at Bender Electronics USA is new business development, sales and the support of ground fault protection equipment for EV, EVSE and BESS.
